APRESENTAÇÃO
PRESENTATION | PRÉSENTATION

sistema minimalista de correr com corte térmico para vidro simples e duplo
minimalist sliding system with thermal break for simple and double glazing
système minimaliste coulissant à rupture de pont thermique pour simple et double vitrage

Concebido especialmente para vãos de grandes dimensões, o sistema minimalista de correr OS-D⁺ surge como resposta às novas tendências arquitetónicas que procuram conjugar o máximo de transparência com o mínimo de vista estrutural em todas as suas versões de soleira: Standard, Oculta com capa de alumínio ou Oculta com pavimento. Conjugando com o sistema de abertura motorizada, o Sistema OS-D⁺ possibilita a conceção de vãos de dimensões consideráveis, permitindo assim uma área extra de envidraçado.

The minimalist sliding system rose as an answer to new architectural trends intending to combine the maximum transparency with the minimum structural view. In all its sill versions: Standard, Concealed with aluminium cover and Concealed with continuous flooring. Combined with the motorized opening system, the OS-D⁺ System allows the design of frames of large dimensions, allowing as such an extra area of glazing.

Spécialement conçu pour les grandes portées le système minimal coulissant apporte une solution aux nouvelles tendances architecturales qui cherchent à conjuguer le maximum de transparence avec une vue structurelle minimale dans toutes ses versions de seuil: Standard, Caché avec capot en aluminium ou Caché avec revêtement sol continu. La combinaison avec le système d'ouverture motorisé permet au système OS-D⁺ de concevoir des ouvertures de dimensions considérables, ce qui permet un espace supplémentaire de vitrage.

CUIDADOS A TER NA FABRICAÇÃO, MONTAGEM E MANUTENÇÃO PARA CAIXILHOS DO SISTEMA OS CARES IN THE MANUFACTURE, INSTALLATION AND MAINTENANCE OF THE OS SYSTEM FRAMES PRÉCAUTIONS POUR LA FABRICATION, L'ASSEMBLAGE ET LA MAINTENANCE DES CADRES DU SYSTÈME OS

1. NA FABRICAÇÃO (CORRETA EXECUÇÃO DOS CAIXILHOS)

MANUFACTURING (CORRECT FRAMES EXECUTION) | DANS LA FABRICATION (EXECUTION CORRECTE DES CHÂSSIS)

Todos os caixilhos deverão ser executados mediante os nossos catálogos técnicos e as nossas instruções técnicas. Sempre que se considerarem insuficientes os dados fornecidos, o Departamento Técnico deverá ser consultado ou solicitada a presença de um Técnico do GRUPO SOSOARES.

All frames must be executed according to our technical catalogs and technical instructions. Whenever deemed insufficient data provided, the Technical Department should be consulted or the presence of a Technician from Grupo Sosoares requested.

Tous les châssis doivent être effectués SELON nos catalogues techniques et nos instructions techniques. Lorsque considèrent insuffisantes les données fournies sont considérés insuffisantes, le Département Technique devra être consulté la présence d'un Technique du Groupe Sosoares requise.

IMPORTANTE | IMPORTANT | IMPORTANT:

- Ao realizar este sistema pela primeira vez, deverá requisitar **obrigatoriamente** a presença de um técnico do GRUPO SOSOARES para auxiliar tecnicamente em todas as fases de execução (corte, maquinação, montagem e aplicação em obra), de pelo menos 1 caixilho:
 - Ter em atenção a correta execução das drenagens de água;
 - Ter em atenção a aplicação das pelúcias corretas;
 - Ter em atenção a aplicação dos corta-vento nos aros fixos;
 - Maquinar os perfis móveis de acordo com os planos do cortante OS;
 - Executar uma correta aplicação de todos os acessórios.
-
- When performing this system for the first time, you should request a **mandatory** presence of a technician from Grupo Sosoares to technically assist you at all stages of the implementation (cutting, milling, assembling and application on site), of at least 1 frame;
 - Beware of the correct execution of water drainage;
 - Beware of the application of the correct brush gasket;
 - Beware of the application of the "Central-gasket" on fixed frames;
 - Milling the mobile profiles according to the OS Cutter Machine plans;
 - Execute a correct application of all accessories.
-
- Pour le première execution du système, veuillez la présence **obligatoire** d'un Technicien du Groupe Sosoares afin de vous assister techniquement pendant toutes les phases d'exécution (coupe, usinage, assemblage et application sur site), au moins d'un châssis;
 - Attention à la mise en œuvre correcte des drainages d'eau;
 - Attention à l'application des joint brosses correctes;
 - Attention à l'application des pièces d'étanchéité dans les dormants;
 - Usinage des profilés mobiles selon les plans d'outillage OS;
 - Application correcte de tous les accessoires.

2. NA MONTAGEM (RIGOR NAS PLANIMETRIAS DOS VÃOS)

IN ASSEMBLY (RIGOUR ON FRAMES' PLANIMETRY) | DANS L'ASSEMBLAGE (RIGEUR DANS LAS PLANIMÉTRIES DES BAIES)

Para um excelente funcionamento, é extremamente importante o executante/instalador deste sistema sensibilizar e responsabilizar o projetista e consequentemente o construtor para um elevado rigor nas planimetrias e nivelamentos da alvenaria para os vãos a que este sistema esteja destinado. Devem conferir estas mesmas características (planimetria e nivelamento) antes de aplicar os aros fixos e só após se confirmarem as devidas condições, fazer a aplicação em obra com idêntico rigor.

In order to achieve an excellent functioning, it is extremely important that the performer/installer of this system should warn and consequently blame the constructor regarding a high accuracy in planimetry and leveling the masonry for the frames that this system is designed for. They should check these same characteristics (planimetry and leveling) before applying the fixed frames and only after the proper conditions are confirmed, apply on site with the same rigour.

Afin d'obtenir les meilleures performances, il est extrêmement important l'exécutant/installateur de ce système sensibilise et responsabilise le concepteur et par conséquent le constructeur par rapport à une grande précision dans les planimétries et le nivellement de la maçonnerie pour les baies dont ce système est destiné. Veuillez vérifier ces mêmes caractéristiques (planimétrie et de nivellement) avant d'appliquer les cadres fixes et seulement après avoir confirmé que les conditions sont appropriées, faire l'application sur site avec la même rigueur.

CUIDADOS A TER NA FABRICAÇÃO, MONTAGEM E MANUTENÇÃO PARA CAIXILHOS DO SISTEMA OS CARES IN THE MANUFACTURE, INSTALLATION AND MAINTENANCE OF THE OS SYSTEM FRAMES PRÉCAUTIONS POUR LA FABRICATION, L'ASSEMBLAGE ET LA MAINTENANCE DES CADRES DU SYSTÈME OS

3. APÓS MONTAGEM (CUIDADOS DE MANUTENÇÃO)

AFTER ASSEMBLY (MAINTENANCE CARES) | APRÈS L'ASSEMBLAGE (PRÉCAUTIONS DE MAINTENANCE)

ALUMÍNIO LACADO E ANODIZADO

POWDER COATED AND ANODISED ALUMINIUM | ALUMINIUM LAQUÉ ET ANODISÉ

O alumínio depois de instalado em obra, requer uma limpeza regular para assim manter a sua superfície em bom estado. Quaisquer que sejam as peças de alumínio, perfis ou acessórios, se não forem devidamente tratadas podem sofrer danos que, em determinadas situações podem ser irreparáveis.

The aluminum, once installed on site, requires a regular cleaning in order to maintain its surface in good condition. Pieces of aluminum including profiles and accessories, if not properly treated, can be damaged that, which in certain situations could be irreparable.

L'aluminium, une fois installé sur site, nécessite d'un nettoyage régulier afin de maintenir sa surface en bon état. Quelles que soient les pièces en aluminium, profilés ou accessoires, par manque de traitement adéquat peuvent être endommagés et dans certaines situations, ces dommages peuvent être irréparables.

CONTATO COM OUTROS MATERIAIS

CONTACT WITH OTHER MATERIALS | CONTACT AVEC D'AUTRES MATÉRIAUX

Sempre que o material for atingido por colas, mástiques ou produtos similares, cimento, cal, tintas ou quaisquer outros elementos utilizados na construção civil, deve-se proceder de imediato à respetiva remoção, recorrendo a um detergente líquido de PH neutro, diluído em água.

Whenever the material is hit by glues, mastics or similar products, cement, lime, paint or any other elements used in construction, you must immediately proceed to the due removal, using a PH neutral liquid detergent diluted in water.

Lorsque le matériel est souillé par des colles, mastics ou produits similaires, le ciment, la chaux, peinture ou d'autres éléments utilisés dans le bâtiment, il faut immédiatement procéder au respectif retrait, en utilisant un détergent liquide de pH neutre dilué avec de l'eau.

LIMPEZA DAS ZONAS DE DESLIZAMENTO

SLIDING AREAS CLEANSING | NETTOYAGE DES ZONES DE COULISSAGE

As zonas por onde deslizam os carrinhos deverão estar sempre limpas e desimpedidas de quaisquer objetos ou materiais (p.ex. areias, pedras, serrins, pós, terras, etc. ...) que possam diminuir as capacidades dos carrinhos, ou mesmo danificá-los. Estas impurezas poderão gerar danos irreparáveis e consequentemente um pior funcionamento do sistema. Tal limpeza deverá ser efectuada tantas vezes quanto as necessárias.

The areas where the sliding wheels carts slide should be kept clean and unobstructed of any objects or materials (sand, stones, dust, e.g. ...) that can reduce the capacity of the roller bearings, or even damage them. These impurities may produce permanent damaged and consequently a worse functioning of the system. Such cleansing must be carried out as many times as necessary.

Les zones où les rouleaux couissent doivent être propres et dégagées de tout objet ou du matériaux (p.ex: sable, pierres, sciure, poudres, terres, etc ...) qui peuvent réduire la capacité des rouleaux, ou même les endommager. Ces impuretés peuvent produire des dommages irréversibles et donc un moins bon fonctionnement du système. Un tel nettoyage doit être effectué autant de fois que nécessaire.

PRODUTOS DE LIMPEZA A UTILIZAR

CLEANING PRODUCTS TO BE USED | PRODUITS DE NETTOYAGE À UTILISER

De um modo geral, um pano macio embebido em água é suficiente para limpar o alumínio. No entanto, para facilitar a operação, pode-se adicionar um detergente neutro líquido e macio, diluído (5% em volume) do tipo "Teepol".

In general, a cloth moistened with water is sufficient to clean aluminum. However, to facilitate the operation you can add a liquid detergent, soft dilute (5% by volume), like "Teepol".

En général, un chiffon doux imbibé d'eau est suffisant pour nettoyer l'aluminium. Toutefois, pour faciliter l'opération, on peut ajouter un détergent neutre liquide et doux dilué (5% en volume) type "Teepol".

PRODUTOS DE LIMPEZA A EVITAR

CLEANING PRODUCTS TO AVOID | PRODUITS DE NETTOYAGE À ÉVITER

Nunca utilizar escovas, lixas, esfregões, ou qualquer outro tipo de material abrasivo, bem como produtos de limpeza à base de solventes (ex. diluente, limpa vidros à base de amónia, etc.).

Never use brushes, scrapers, mops, or any other kind of abrasive material as well as cleaning products based on solvents (eg diluent wiper based on ammonia, etc.).

Ne jamais utiliser des brosses, du papier de verre, vadrouille, ou de tout autre matériau abrasif ainsi que des produits de nettoyage à base de solvants (ex. diluant, essuie-glace à base d'ammoniac, etc.).

CUIDADOS A TER NA FABRICAÇÃO, MONTAGEM E MANUTENÇÃO PARA CAIXILHOS DO SISTEMA OS **CARES IN THE MANUFACTURE, INSTALLATION AND MAINTENANCE OF THE OS SYSTEM FRAMES** **PRÉCAUTIONS POUR LA FABRICATION, L'ASSEMBLAGE ET LA MAINTENANCE DES CADRES DU SYSTÈME OS**

PRODUTOS DE LIMPEZA A EVITAR

CLEANING PRODUCTS TO AVOID | PRODUITS DE NETTOYAGE À ÉVITER

Nunca utilizar escovas, lixas, esfregões, ou qualquer outro tipo de material abrasivo, bem como produtos de limpeza à base de solventes (ex. diluente, limpa vidros à base de amónia, etc.).

Never use brushes, scrapers, mops, or any other kind of abrasive material as well as cleaning products based on solvents (eg diluent wiper based on ammonia, etc.).

Ne jamais utiliser des brosses, du papier de verre, vadrouille, ou de tout autre matériau abrasif ainsi que des produits de nettoyage à base de solvants (ex. diluant, essuie-glace à base d'ammoniac, etc.).

FREQUÊNCIA DA LIMPEZA

CLEANING FREQUENCY | FRÉQUENCE DE NETTOYAGE

A limpeza deve ser levada a cabo sempre que a aparência natural do acabamento começar a alterar ou quando forem notórios depósitos de poluição atmosférica ou industrial. Pode no entanto, ser estabelecida a seguinte regra, respeitante à frequência da limpeza:

- Zonas marítimas e/ou industriais: 3 meses;
- Zonas rurais: 6 meses;
- Zonas onde ocorram fortes deposições de sal: deve ser identificada a frequência de limpeza de modo a não permitir a permanência prolongada dos sais.

Cleaning should be carried out whenever the natural appearance of the aluminium treatment starts to change or when industrial and air pollution deposits become notorious. We may however establish the following rule concerning the frequency of cleaning:

- Industrial and/or seaside: 3 months;
- Countryside: 6 months;
- Areas where a heavy deposition of salt happens: please adapt the cleaning frequency in order to prevent the prolonged permanence of salts.

Le nettoyage doit être effectué lorsque l'aspect naturel de la finition commence à changer ou lorsque les dépôts de la pollution atmosphérique ou industrielle deviennent visible. Nous pouvons établir cependant la règle suivante concernant la fréquence de nettoyage:

- Zones maritimes et / ou industriels: 3 mois;
- Zones rurales: 6 mois;
- Les zones où se produisent d'importants dépôts de sel: veuillez adapter de façon à ce sorte que la fréquence de nettoyage ne permette pas aux sels une permanence prolongée.

MUITO IMPORTANTE VERY IMPORTANT | TRÈS IMPORTANT:

De forma a garantir uma correta aplicação do aro fixo, terá de ser considerada uma folga de 1 mm na parte superior.
In order to guarantee the correct application of the fixed frame, a 1 mm gap at the top must be taken into account.
Afin de garantir l'application correcte du cadre dormant, il faut tenir compte d'un espace de 1 mm en haut.

Para garantir uma correta vedação, selar a totalidade dos canais, aplicando silicone previamente à fixação do topo.
To ensure proper sealing, seal all channels by applying silicone before fixing the end-cap.
Pour garantir une étanchéité correcte, sceller l'ensemble des canaux en appliquant du silicone avant de fixer le embout.

INSTRUÇÕES DE MONTAGEM

ASSEMBLY INSTRUCTIONS | INSTRUCTIONS D'ASSEMBLAGE

• Fechadura Magnética | Magnetic lock | Serrure magnétique

1 - Depois de mecanizar o perfil aro fixo, aplicar os rebites nos furos da parte posterior do perfil.

After machining the fixed frame profile, apply the rivets to the holes in the back of the profile. | Après usinage du profilé du cadre dormant, poser les rivets dans les trous situés à l'arrière du profilé.

2 - Colocar os tubos no interior do perfil de forma a que os rebites fiquem no seu interior.

Place the tubes inside the profile so that the rivets are placed inside. | Placer les tubes à l'intérieur du profilé de manière à ce que les rivets soient à l'intérieur.

3 - Pousar a fechadura em cima dos tubos, apontando os parafusos pelo interior dos tubos, de forma a aparafusar diretamente nos rebites.

Place the lock on top of the tubes, pointing the screws along the inside of the tubes so that they screw directly into the rivets. | Placez la serrure sur les tubes, en orientant les vis le long de l'intérieur des tubes de manière à ce qu'elles se visent directement dans les rivets.

• Testa Magnética | Magnetic plate | Gâche magnétique

1 - Depois de efetuada a maquinação do perfil móvel, posicionar a testa na zona frontal do perfil.

Once the mobile profile has been machined, place the plate at the front of the profile. | Une fois le profilé ouvrant usiné, placez le gâche à l'avant du profilé.

2 - Colocar as molas junto aos furos da poliamida posterior do perfil.

Place the springs next to the holes in the back polyamide of the profile. | Placer les ressorts à côté des trous dans le polyamide arrière du profilé.

3 - Passar os parafusos através das anilhas, das molas e das poliamidas, aparafusando à testa até ao final da rosca.

Pass the screws through the washers, springs and polyamides, screwing into the plate until the end of the thread. | Passer les vis à travers les rondelles, les ressorts et les polyamides, en les vissant à la gâche jusqu'à la fin du filetage.

MAQUINAÇÕES PARA EMENDA DA GUIA INOX STAINLESS STEEL GUIDE EXPANSION AND MEND DETAIL USINAGES POUR AMENDMENT DE LA GUIDE D'ACIER INOXYDABLE

PASSO | STEP | ÉTAPE 1:

Com a guia aplicada no vedante e na soleira, furar conforme esquema e abrir rosca M3 no alumínio.

With the guide applied in the seal and the sill, drill as per the scheme and thread in the alumum.

Avec le guide appliqué sur le joint et le seuil, percez selon le schéma et filetage en aluminium.

PASSO | STEP | ÉTAPE 2:

Retirar a guia do vedante e escarear os furos conforme esquema.

Remove the guide from the joint and countersink the holes according to the scheme.

Retirez le guide de joint et fraiser les trous selon le schéma.

Desta forma conseguimos garantir que os parafusos ficam embutidos na guia e não comprometem o deslizamento dos carrinhos.
This way we can ensure that the screws are embedded in the guide and do not compromise the sliding of the roller bearings.
De cette façon, nous pouvons nous assurer que les vis sont encastrées dans le guide et ne compromettent pas le glissement des rouleaux.

PASSO | STEP | ÉTAPE 3:

Com a guia novamente no vedante e na soleira, aplicar os parafusos.

With the guide back on the seal and the threshold, apply the screws.

Avec le guide en arrière sur le joint et le seuil, appliquez les vis.

PASSO 4: Depois de fixar os Topos de Bloqueio de Pelúcia CV, podem aplicar-se normalmente as tampas OS 30.
STEP 4: After fixing the PILE SEAL Lock End-caps CV, the OS 30 covers can be applied normally.
ÉTAPE 4 : Après avoir fixé l'embouts de Joint Brosse CV, les profilés OS 30 peuvent être appliqués normalement.

APLICAÇÃO DA PEÇA ANTI-LEVANTAMENTO OS

OS ANTI-LIFT ACCESSORY ASSEMBLY

ASSEMBLAGE DE L'ACCESSOIRE DE ANTI-LEVAGE

1. EXTREMIDADE SUPERIOR DO CAIXILHO

FRAME'S UPPER EDGE | EXTRÉMITÉ SUPÉRIEUR DU CHÂSSIS

PASSO 1 | STEP 1 | ÉTAPE 1

Posicionar a peça anti-levantamento OS no canto superior do caixilho, centrada com a guia superior OS 35 e usá-la para determinar o ponto onde se deve abrir rosca no esquadro (utilizar uma broca de 3mm).

Position the OS anti-lift part in the upper corner of the frame, centered with the OS 35 top guide and use it to determine the point where the blocking bracket should be threaded (use a 3mm drill).

Placez la pièce anti-soulèvement OS dans l'angle supérieur du cadre, centrée avec la guide supérieur OS 35 et utilisez-la pour déterminer le place où fileter l'équerre (utilisez un foret de 3 mm).

PASSO 2 | STEP 2 | ÉTAPE 2

Aparafusar a peça diretamente ao caixilho (ter em atenção que o parafuso irá roscar no esquadro).

Screw the part directly into the frame (note that the screw will thread into the blocking bracket).

Vissez la pièce directement dans le cadre (notez que la Vis va se Visser dans l'équerre).

PASSO 3 | STEP 3 | ÉTAPE 3

Colocar o tapa-furos para ocultar o parafuso.

Insert the hole-cover to hide the screw.

Insérez le couvercle du trou pour cacher le Vis.

PASSO 4 | STEP 4 | ÉTAPE 4

Repetir os passos anteriores na outra extremidade superior do caixilho.

Repeat the previous steps on the other upper edge of the frame.

Répétez les étapes précédentes à l'autre extrémité supérieure du cadre.

APLICAÇÃO DAS CAPAS SO 60 E SO 63

SO 60 AND SO 63 COVERS APPLICATION

APPLICATION DES COUVERTURES SO 60 ET SO 63

Na aplicação dos perfis SO 60 e SO 63, no perfil 3-Rail SO 12, deverá aplicar-se uma das pelúcias conforme esquema abaixo:

When applying the SO 60 and SO 63 profiles, in the 3-Rail SO 12 profile, one of the pile seals must be applied according to the scheme below:

Lors de l'application des profilés SO 60 et SO 63, dans le profilé 3-Rail SO 12, une des joint brosses doit être appliquée selon le schéma ci-dessous:

APLICAÇÃO DO CARRINHO OS Nº 5 OS Nº5 ROLLIER BEARING APPLICATION APPLICATION DU ROULEAU Nº 5

Só se aplica o calço caso seja necessário proceder à afinação.

The shim is only applied if window regulation is necessary.

La cale est appliquée uniquement si la réglage de la fenêtre est nécessaire.

Os Carrinhos OS Nº5 têm de ser aplicados com os furos virados para cima.
A colocação dos Carrinhos OS com os furos voltados para baixo pode provocar o mau deslizamento e, consequentemente, o mau funcionamento da folha.

OS Nº5 Roller Bearings must be applied with the holes facing up.
The placement of the roller bearings with the holes facing down causes bad sliding and consequently leaf malfunctioning.

Rouleaux OS Nº5 doivent être appliqués avec les trous tourné vers le haut.
Le placement des rouleaux avec les trous tourné vers le bas entraîne des problèmes de glissement et, par conséquent, un mauvais fonctionnement du vantail.

APLICAÇÃO CALÇO FIXO OS-DOUBLE - Janela de correr de 2 folhas + fixo em canto de 90°

OS-DOUBLE FIXED SHIM APPLICATION - 2 Leaves sliding window + fixed in 90° corner

APPLICATION DE CALE FIXE OS-DOUBLE - Fenêtre coulissant à 2 vantaux + cadre fixe en angle 90°

FIXAÇÃO DOS CAIXILHOS EM OBRA

FRAMES FIXING

FIXATION DES CHÂSSIS

O vão sobre o qual é aplicado o aro deve ser rígido;
 Os elementos de enquadramento devem evitar a existência de pontes térmicas (p.ex.: junta de remate de parede);
 O caixilho deve ser aplicado de forma complanar com o isolamento térmico da parede;
 A estanquidade da junta entre o aro e o vão é obtida a partir de um cordão contínuo de silicone devendo ser garantida a aderência do mesmo nas diversas superfícies em contacto;
 Para a correta aplicação do silicone, a folga entre o aro e o vão deve estar compreendida entre os 4 e 8 mm;
 Nos pontos de fixação do aro fixo ao vão, devem aplicar-se calços, de forma a compensarem eventuais irregularidades do vão, e permitirem as dilatações térmicas do caixilho de alumínio face à parede;
 Os parafusos a utilizar na fixação do vão devem ser em aço inoxidável e com buchas adequadas à natureza do vão;
 O número de pontos de fixação deve ser suficiente para assegurar a resistência da ligação do aro ao vão, podendo ser tomado como referência o número de pontos indicados na figura;
 A fixação inferior do vão deve ser feita de modo que não existam furos nos perfis inferiores do alumínio (p.ex. através de calços de travamento fixos ao vão).

The space over which the frame is applied must be rigid;
 The framing elements must prevent the existence of thermal bridges (e.g. wall finishing joint);
 The frame must be applied flush with the wall's thermal insulation;
 The joint between the frame and the span is sealed with a continuous silicone cord, which must adhere to the various surfaces in contact;
 For the silicone to be applied correctly, the gap between the frame and the span must be between 4 and 8 mm;
 At the points where the fixed frame is attached to the opening, shims should be applied to compensate for any irregularities in the opening and allow for thermal expansion of the aluminium frame against the wall;
 The screws used to fix the frame must be made of stainless steel and have bushes suitable for the nature of the span;
 The number of fixing points must be sufficient to ensure the strength of the connection between the frame and the span. The number of points indicated in the figure can be taken as a reference;
 The lower fixing of the opening must be done in such a way that there are no holes in the lower aluminium profiles (e.g. by means of locking shims fixed to the span).

L'espace sur lequel le cadre est appliqué doit être rigide;
 Les éléments d'encadrement doivent empêcher l'existence de ponts thermiques (par exemple, joint de finition murale);
 Le cadre doit être appliqué au ras de l'isolation thermique du mur;
 Le joint entre le cadre et la portée est scellé à l'aide d'un cordon en silicone continu, qui doit adhérer aux différentes surfaces en contact;
 Pour que le silicone soit appliqué correctement, l'espace entre le cadre et la portée doit être compris entre 4 et 8 mm;
 Aux points où le cadre fixe est fixé à l'ouverture, des cales doivent être utilisées pour compenser les irrégularités de l'ouverture et permettre la dilatation thermique du cadre en aluminium contre le mur;
 Les vis utilisées pour fixer le cadre doivent être en acier inoxydable et être équipées de douilles adaptées à la nature de la portée;
 Le nombre de points de fixation doit être suffisant pour garantir la solidité de la liaison entre le cadre et la portée. Le nombre de points indiqué dans la figure peut être pris comme référence;
 La fixation inférieure de l'ouverture doit être réalisée de manière à ce qu'il n'y ait pas de trous dans les profils inférieurs en aluminium (par exemple à l'aide de cales de blocage fixées à la portée).
